Re: Application No. 10/064,627

Dear Mr. Weddington,

Thank you very much for your office action and your guidance regarding corrections to the claims. According to your advice I have revised claim 1 to meet the 35 U.S.C. 121 requirements to elect a single disclosed species. As you educated me, if this claim is specific then claims 2 as well as 15-23 will be in order because they are dependent on claim 1. The revised claim 1 is stated below:

- 1- Method for lowering ocular hypertension, comprising administering to a patient in need thereof, a topical ophthalmic eye drop or ointment containing Nitric Oxide (NO) releasing agents such as Pyrimidine (also known as Minoxidil or Rogain^{RTM}) and cGMP-PDE5 inhibitors such as Sildenafil Citrate (also known as Viagra^{RTM}).

I sincerely hope the claims are now satisfactory.

With best personal regards, I remain,

Sincerely,

Mohsen Shahinpoor
